What does the "GF" column represent?

The heading for this column is a "GF" (Goals For). It may also include a number. It represents the total number of goals scored in round robin games. If a number is also shown, such as 4, the total will only include up to 4 goals per game. In that case if a team played 3 games and they scored 1, 7 and 3 goals respectively, in their three games, the total would be 8, since only the first four goals in their second game would count.
